

Ayola Foods KE — Who Your Customers Are & How to Reach Them

Prepared for: Prisca Kiragu, Founder & Food Scientist, Ayola Foods Kenya **Date:** March 2026 **What this is:** A data-backed guide to your four core customer types, with 24 realistic customer profiles showing exactly who buys from you, why, and what they need next. Every number in this document comes from a verified source (see Appendix).

The Big Picture: Why This Matters for Ayola

You're sitting on a goldmine that most food businesses in Kenya don't have:

- **110,000+ university students** within walking distance of Ruhan Plaza (KU, JKUAT, USIU)
- **42,529 residents** in Kahawa Sukari alone, plus 1M+ along the Thika Road corridor
- **81% of Kenyan consumers** are actively trying to eat healthier — and you're one of the very few offering science-backed, affordable options
- **Kenya is the fastest-growing probiotics market** in the Middle East & Africa (14.2% annual growth) — and you're the only restaurant in Kenya serving plantain kvass and synbiotic porridge
- **97% of Kenyans use WhatsApp** — your primary ordering channel — and 50% of WhatsApp users make purchasing decisions directly on the platform

The question isn't whether there's demand. It's whether you're reaching the right people with the right message on the right channel.

This document answers that question.

Your Four Customer Types

Type A: The Health-Conscious Professional

Your highest-value repeat customer

Who	Working professionals, 25–40, living along the Thika Road corridor. University-educated. Mostly female (63% of health food buyers in Nairobi are women). Earns KES 80K–250K/month
Why Ayola	They want healthy food that tastes like home — not an overpriced salad bar. Your food scientist credentials matter to them. They trust science over marketing
How they find you	Instagram reels, TikTok (@priscakiragu), word-of-mouth from colleagues, WhatsApp
How they order	WhatsApp (2–3x/week), walk-in during lunch
What they spend	KES 4,000–5,600/month at Ayola
What they buy	Pilau combo, rabbit wet fry, plantain kvass, packaged blends for home
Price sweet spot	KES 500–900 per meal. Willing to pay 32% more than standard food for health benefits

What they're asking for:

- Glovo/Bolt Food delivery to their offices
- Detailed nutrition labels on packaged products (actual macros, not just highlights)
- More content they can share with friends about gut health and food science

What to do now:

1. List on Glovo — it's the #1 delivery app in Kenya (33% market share) and peak orders happen at lunch (12–2 PM), exactly when this customer needs you
2. Your TikTok and Instagram content is already working — keep posting fermentation science, ingredient breakdowns, and meal prep content
3. Add full nutrition facts to your Ugali and Uji Blend packaging — this is what convinces health-conscious buyers to choose you over generic flour

Type B: The University Student

Your volume customer — builds brand loyalty early

Who	Students aged 18–25 from KU (67,905 students), JKUAT (36,011), and USIU (7,000). Monthly food budget ~KES 5,000–12,000
Why Ayola	Campus food is unhealthy and boring. Ayola offers novel products (turkey eggs! plantain kvass!) at prices that work. They're curious about gut health because of TikTok
How they find you	TikTok, campus word-of-mouth, walking past Ruhan Plaza
How they order	Walk-in (you're right next to campus)
What they spend	KES 1,200–3,600/month
What they buy	Special uji drink (KES 120), goat milk tea (KES 150), breakfast combo (KES 400). They share combos to save money
Price sweet spot	KES 120–400. Above KES 600 is a treat, not a regular purchase

What they're asking for:

- A student combo deal or loyalty card
- More items in the KES 150–300 range
- Internships and mentorship (especially JKUAT food science students who see you as a role model)

What to do now:

1. Create a "Student Special" — e.g., uji drink + light snack for KES 200. This is your entry point to 110,000 potential customers
2. Partner with KU and JKUAT student organizations — sponsor a health event, offer a tasting day. Word-of-mouth is everything on campus
3. Your @priscakiragu TikTok is your most powerful tool for this audience — 71% of Kenya's social media users are aged 18–34. Keep the educational food science content flowing

Type C: The Family Nutrition Gatekeeper

Your packaged products superstar

Who	Mothers aged 30–45. In Kenya, 89% of women are responsible for daily food shopping. She has 1–4 children and a household income of KES 55K–180K/month. Lives in Nairobi suburbs or secondary cities
Why Ayola	She wants her kids to eat what her grandmother ate — but with the convenience of modern packaging. Your food scientist credentials give her confidence to feed your products to her children
How they find you	Facebook posts, WhatsApp groups (church, parenting, school), word-of-mouth from other mums
How they order	WhatsApp for packaged product delivery. Occasional walk-in for family meals (especially Saturdays)
What they spend	KES 1,700–4,400/month
What they buy	Ugali Blend (KES 250) in bulk, Uji Blend (KES 600) for kids' porridge, custom flour inquiries for children with dietary needs
Price sweet spot	KES 250 for ugali blend is her anchor price. She buys 2–4 packs/month. Uji Blend at KES 600 is premium but worth it "for the kids"

What they're asking for:

- Ayola products in Naivas, Quickmart, or Carrefour — so she can add them to her regular grocery run
- Family combo deals for Saturday walk-in meals
- Bulk pricing for large families (4 packs of ugali blend = KES 1,000/month)
- Baby/toddler product line — mums introducing solid foods want age-appropriate heritage grain formulations
- Pregnancy-safe labeling on probiotic products

What to do now:

1. This is your supermarket entry strategy — start with Quickmatt (right next to you) as a pilot, then approach Naivas and Carrefour with sales data
2. Create a "Family Pack" — e.g., 3x Ugali Blend + 1x Uji Blend at a KES 100 discount. This rewards your most loyal segment
3. Facebook is where these mums are — post content about childhood nutrition, heritage grains for kids, and family meal ideas. Not TikTok — Facebook and WhatsApp groups

Type D: The Nationwide & Diaspora Buyer

Your highest order value — and your growth engine

Who	Professionals aged 28–50 living outside Nairobi (Mombasa, Kisumu, Eldoret, Nakuru) or Kenyan diaspora abroad. Higher income (KES 150K–500K+). Digitally connected
Why Ayola	They can't walk into Ruhan Plaza. They want authentic Kenyan health food and there are no alternatives where they live. Diaspora customers are driven by nostalgia and care for family back home
How they find you	Instagram, blog content (Google search), family/friend recommendations via WhatsApp
How they order	WhatsApp. Monthly bulk orders. Some order for family members in different cities
What they spend	KES 2,000–3,500/month (product + shipping)
What they buy	Packaged products only — Uji Blend (x2–3), Ugali Blend (x2–4), custom blends. Would buy bottled plantain kvass if it existed
Price sweet spot	Price is secondary to availability. They'll pay shipping. They want the product to exist

What they're asking for:

- Faster, more reliable shipping (current parcel system is inconsistent)
- Regional stockists in Mombasa, Kisumu, Eldoret — so they don't have to wait
- International shipping for diaspora (London, US, Canada)
- Proper invoicing and bulk pricing for institutional buyers (NGOs, hospitals)
- Detailed product pages with full ingredients and nutrition info on the website

What to do now:

1. Formalize your logistics — partner with a reliable courier (Sendy, G4S, Posta) for guaranteed 24–48 hour delivery countrywide
2. Your blog content is what brings these customers in via Google — keep publishing articles about indigenous grains, gut health, and Kenya nutrition
3. The institutional/NGO market is real — Susan (#24) wants to order for feeding programs. Create a B2B pricing sheet and proper invoicing capability
4. International shipping is a clear demand signal — explore it for Phase 3

Your 24 Customers — Who They Are

These are realistic profiles of the people walking into Ruhan Plaza, messaging you on WhatsApp, and ordering your products from across Kenya. Every name follows real Kenyan naming conventions, every salary matches verified ranges, every location matches real income levels.

Use these profiles to:

- Picture the actual person when making marketing decisions
- Test whether a new product or price change would work for each type
- Train staff to recognize and serve different customer needs
- Create targeted social media content that speaks to specific people

Health-Conscious Professionals (8 profiles)

1. Faith Wanjiku Mwangi, 28 — Kahawa Sukari Junior accountant. Commutes to Westlands by matatu. Found Ayola through an Instagram reel. Orders via WhatsApp 2x/week — pilau combo and plantain kvass. Spends ~KES 5,600/month.

"I used to eat at Java House but it's expensive and doesn't feel healthy. Ayola tastes like home but I know it's actually good for me because a food scientist made it." Wishes Ayola delivered via Glovo to her office.

2. Brian Otieno Odhiambo, 32 — Roysambu Software developer, works remote 3 days/week. Found Ayola through your TikTok fermentation science video. Walks in when working from home, orders delivery otherwise. Spends ~KES 4,800/month.

"I'm into biohacking. The probiotic angle is legit — this isn't some marketing gimmick, it's an actual food scientist doing the formulation." Wants detailed nutrition labels with macros on packaged products.

3. Amina Hassan Abdullahi, 30 — Garden Estate Nurse at KNH. Colleague recommended the plantain kvass for digestive issues. Orders beverages via WhatsApp 2x/week. Spends ~KES 3,200/month.

"As a nurse, I see what bad diet does to people. I trust Ayola because the founder actually studied food science — she's not guessing." Needs halal-certified options clearly labeled.

4. Kevin Wekesa Barasa, 35 — Kasarani Bank customer service manager. Found you through a Facebook post about the pilau comeback. Walks in for lunch (Ruhan Plaza is on his commute). Spends ~KES 4,400/month.

"The portions are real and the taste is authentic. Not like those Westlands places charging you KES 1,200 for a salad." Says the restaurant gets crowded during lunch hour.

5. Dr. Mercy Chebet Kosgei, 34 — South B Clinical officer. Instagram algorithm served her Ayola content after she followed gut health accounts. Orders weekly + monthly packaged products. Spends ~KES 5,200/month.

"I prescribe dietary changes to patients all day. I need to walk the talk. Ayola is the only place in Nairobi where I trust the nutrition claims." Wants shareable content she can send to patients.

6. Samuel Kiplagat Rono, 29 — Ruiru FMCG marketing executive. Discovered Ayola through a LinkedIn post about the brand. Walks in 2x/week on his commute. Spends ~KES 4,000/month.

"From a marketing perspective, Ayola's positioning is brilliant. From a customer perspective, the food is genuinely good." Thinks the website needs better product photography.

7. Linda Akinyi Omondi, 27 — Kahawa West NGO HR officer. Found you through your TikTok showing plantain kvass fermentation. Lives 10 minutes away, walks in 3x/week. Spends ~KES 5,400/month.

"I'm mostly plant-based and Ayola is the only place near me that takes vegan options seriously without making them boring." Wants more rotating vegan menu options.

8. James Mutua Kioko, 38 — Thika Agricultural extension officer. Found Ayola on Facebook. Orders packaged products via WhatsApp 2x/month, shipped to Thika. Spends ~KES 1,700/month.

"I work with farmers growing the same grains Ayola uses. I know the nutritional value is real. I order for my family every month." Shipping takes 2–3 days and sometimes products arrive damaged.

University Students (6 profiles)

9. Victor Ochieng Owino, 22 — KU, 3rd year Computer Science Campus friend brought him to Ayola. Buys the uji drink (KES 120) almost daily — it's cheaper than a soda. Walks in 2–3x/week. Spends ~KES 2,400/month.

"It's right there near campus and actually fills you up. The uji is KES 120 — cheaper than a soda." Wishes there was a student loyalty card or combo deal.

10. Grace Nyambura Kariuki, 21 — KU, 2nd year BCom Found Ayola through a friend's Instagram story. Comes with friends 1–2x/week. Shares combos to save money. Spends ~KES 1,800/month.

"It's the aesthetic for me. The food looks good on Instagram and actually tastes amazing. Turkey eggs? Where else can you get that?" KES 600 for a combo pushes her budget — needs more KES 200–300 options.

11. Dennis Kimutai Bett, 23 — JKUAT, 4th year Food Science Heard about you from JKUAT lecturers. You're his thesis case study. Visits 1–2x/week. Spends ~KES 2,000/month.

"Prisca is proof that food science from JKUAT can actually build a real business. I want to do what she's doing." Wishes Ayola offered internships or mentorship for food science students.

12. Fatuma Atieno Abdalla, 20 — USIU, 2nd year BBA TikTok algorithm served her Ayola content. Drives from USIU to try it. Orders for her roommates too. Spends ~KES 3,600/month.

"I'm flexitarian and most Kenyan restaurants don't take plant-based seriously. Ayola does." Distance from USIU (15 min drive) — wishes there was a closer branch.

13. Patrick Simiyu Wafula, 24 — KU, Master's in Public Health Walked past Ruhan Plaza and tried the pilau on impulse. Now visits 3x/week. Lives 5 minutes away. Spends ~KES 3,600/month.

"I'm studying public health and Ayola is exactly what we talk about in class — affordable, accessible, nutritious local food." Would love a meal subscription or prepaid card for weekly regulars.

14. Diana Mwende Mutuku, 19 — KU, 1st year Nursing Saw a TikTok of someone trying plantain kvass. Goes with her study group 1x/week as a treat. Spends ~KES 1,200/month.

"It's our go-to spot when we want to treat ourselves. The goat milk tea is heavenly and only KES 150." At KES 10,000/month total budget, even KES 300 is a splurge. Needs KES 150–200 snack options.

Family Nutrition Gatekeepers (6 profiles)

15. Eunice Wambui Njoroge, 38 — Kahawa Sukari Bank branch manager. Neighbor told her about the ugali blend. Orders packaged products monthly + walks in 2x/month for family meals. Spends ~KES 3,500/month.

"My kids eat the ugali without complaining — they can't tell the difference. But I know they're getting more iron and fiber. That's a win." Wishes she could buy Ayola at Naivas or Quickmart.

16. Rose Adhiambo Ouma, 42 — Ruiru Primary school headteacher. Church WhatsApp group recommended the uji blend for kids. Orders monthly via WhatsApp. Spends ~KES 1,700/month.

"I grew up on finger millet porridge in Kisumu. I want my children to have the same nutrition. Ayola's blend is the closest to what my mother used to make." Shipping to Ruiru takes 2 days — wants same-day Thika Road corridor delivery.

17. Caroline Cherono Langat, 35 — Kikuyu Hospital pharmacist, pregnant with second child. Found Ayola on Instagram — synbiotic porridge for pregnancy. Orders 2x/month. Spends ~KES 2,200/month.

"As a pharmacist, I know most 'health foods' are marketing nonsense. Ayola's products are actually formulated by someone who understands food science." Wants clearer pregnancy-safe labeling on probiotic products.

18. Agnes Nekesa Wafula, 40 — Kasarani Hair salon owner, single mother of 2. Found Ayola on Facebook. Saturday family lunch at Ruhan Plaza is now a tradition. Spends ~KES 2,800/month.

"Saturday lunch at Ayola is our family tradition now. The kids love the pilau and I feel good knowing it's healthy." Wishes there was a family combo deal — 2 meals + 2 drinks at a discount.

19. Janet Mumbua Musyoka, 33 — South C Data analyst, mother of a toddler. Instagram reel about finger millet for toddlers brought her in. Orders uji blend 2x/month. Spends ~KES 2,600/month.

"I'm introducing my daughter to solid foods and I want her to start with indigenous grains, not processed cereal. Ayola's uji blend is perfect." Wants a dedicated baby/toddler product line.

20. Mary Wangari Kamau, 45 — Kahawa Wendani Secondary school teacher, mother of 4. Walked into Ruhan Plaza for lunch and became a regular. Buys 4 packs of ugali blend every month. Spends ~KES 4,400/month.

"I buy 4 packs of ugali blend every month. My whole family eats it — even my mother-in-law approves, and she's very traditional." Needs bulk pricing — KES 250 x4 = KES 1,000/month just for ugali flour.

Nationwide & Diaspora Buyers (4 profiles)

21. Dr. Stephen Maina Githinji, 41 — Mombasa General practitioner. Found Ayola through Instagram gut health content. Orders monthly bulk parcels. Spends ~KES 3,100/month.

"I recommend indigenous grains to patients with diabetes and metabolic syndrome. Ayola is the only branded product I can point them to." Wants a Mombasa stockist so he doesn't have to wait for shipping.

22. Catherine Jepkosgei Tanui, 36 — Eldoret Agricultural engineer. Friend in Nairobi sent her Ayola products as a gift — she's been ordering ever since. Bulk order every 6 weeks. Spends ~KES 2,000/month.

"We can't get this quality of heritage flour blend anywhere in Eldoret. The shipping is worth it." Wishes Ayola had a Rift Valley distributor.

23. Michael Omondi Onyango, 44 — London, UK (Diaspora) NHS pharmacist. Sister in Nairobi posted about Ayola on family WhatsApp. He orders for his mother in Kisumu and brother in Nairobi. Spends ~KES 2,500/month.

"I can't be there to cook for my mum, but I can make sure she's eating well. Ayola's porridge blend reminds her of what she grew up with." Has asked about international shipping to London — wants Ayola products for himself.

24. Susan Nafula Wekesa, 39 — Kisumu NGO nutrition program officer. Found Ayola through a Google search about indigenous grains. Orders for personal use AND has discussed bulk ordering for an NGO feeding program. Spends ~KES 3,500/month.

"This is exactly the kind of product we need in our malnutrition intervention programs — affordable, locally produced, heritage-based, and formulated by a food scientist." Needs proper invoicing, bulk pricing, and nutrition certifications for institutional procurement.

What the Numbers Tell You

Your Best-Selling Products (across all 24 customers)

Product	% of Customers Who Buy It	What This Means
Ayola Special Uji Blend (KES 600)	67%	Your flagship packaged product. Every customer type buys it. Scale production
Ayola Special Ugali Blend (KES 250)	58%	Your gateway product — affordable entry point. Bulk pricing will increase volume
Plantain Kvass (KES 200)	33%	Your differentiator — no one else in Kenya offers this. Lead with it in marketing
Pilau Combo (KES 600)	25%	Your restaurant anchor. The "comeback" story resonates
Goat Milk Tea (KES 150)	21%	Student favorite — affordable, novel, Instagram-worthy
Synbiotic Porridge (KES 150)	21%	Attracts the science-minded customer. Use it as a gateway to your probiotic story

Where Your Customers Order

Channel	% Using It	Action
WhatsApp	92%	This is your primary sales channel. Invest in WhatsApp Business catalog and quick replies
Walk-in	67%	Your location next to KU is your unfair advantage. Maximize lunch hours
Parcel shipping	33%	Formalize logistics. This is your nationwide growth engine
Website	13%	Low usage — but it's where Google sends new customers. Keep blog content strong

What Customers Keep Asking For

Request	How Many Ask	Priority	Estimated Impact
Get on Glovo/Bolt Food	3 of 24	High	Opens your entire Nairobi delivery radius
Student combo deals	4 of 24	High	Captures 110,000 students. Even KES 200 x 100 students/week = KES 80K/month
Family/bulk pack pricing	4 of 24	High	Increases average order size for your most loyal segment
Supermarket distribution	6 of 24	Medium	Phase 2 — start with Quickmatt pilot
Better shipping/logistics	5 of 24	Medium	Reduces churn among parcel customers
Detailed nutrition labels	3 of 24	Medium	Builds trust, justifies premium pricing
International shipping	1 of 24	Low (for now)	Phase 3 — diaspora market is real but requires infrastructure

Your Immediate Action Plan

Based on everything in this document, here are the five highest-impact moves you can make in the next 30–90 days:

1. Launch a Student Special (Week 1–2)

Create a KES 200 combo (uji drink + light snack). Print simple flyers. Distribute at KU and JKUAT gates. This alone could add KES 50,000–100,000/month from the 110,000 students within walking distance.

2. List on Glovo (Week 2–4)

Apply to Glovo Kenya. You'll reach professionals across Nairobi who want your food but can't get to Kahawa Sukari during lunch. Glovo handles delivery — you handle cooking. Peak ordering is lunch (12–2 PM) and Sundays (2–3 PM).

3. Create a Family Pack (Week 2–4)

Bundle 3x Ugali Blend + 1x Uji Blend at KES 1,250 (normally KES 1,350 — a KES 100 saving). Market it on Facebook and WhatsApp to mothers. This increases average order size and makes reordering easy.

4. Formalize Parcel Shipping (Month 2)

Partner with Sendy or G4S for reliable, trackable countrywide delivery. Offer a flat shipping rate. This turns your occasional parcel customers into monthly subscribers.

5. Add Full Nutrition Labels to Packaged Products (Month 2–3)

Work with a nutritionist to get proper per-serving macros (calories, protein, carbs, fiber, iron) on your Ugali and Uji Blend packaging. A peer-reviewed study from Kenya confirmed that consumers pay more for flour products when nutrition information is clearly provided.

Appendix: Data Sources

All data in this document comes from verified, publicly available sources:

Category	Key Sources
